

## Ensure your SST Cold Spray System is Properly Calibrated

With the SST Cold Spray Calibration Kit, you have everything you need to calibrate SST Cold Spray equipment temperature and pressure controls. The kit allows users to calibrate for pressures ranging from 7 to 35 bar (100 to 500 psi) and temperatures up to 550°C (1022° F).

### Features:

- Suitable for all standard SST Series P & EP machines and all spray guns, both handheld and robotic
- Satisfies FAA equipment calibration requirements
- Includes software upgrades and passcode to access the calibration menu on the touch pad control screen
- Includes custom temperature and pressure calibration instruments
- Instruments included with the kit are calibrated and traceable to NIST standards (calibration certificates included)
- Capable of +/- 2% calibration accuracy
- Special calibration adaptor component which allows the user to install the calibrated thermocouple to the spray gun
- Designed for convenient use and can be operated by a single person
- Durable design and quality components in a protective case with foam insert
