SCAN THE DAMAGE. CONVERT THE TOOL PATH. COLD SPRAY THE AREA.

Smart Repair combines **high-resolution 3D scanning** with automated tool path generation to restore critical components.

The Smart Repair Workflow

Built for Real-World Impact

MISSION ASSURANCE

Extend product life and maintain operational readiness.

RAPID DEPLOYMENT

Scan-to-spray workflow eliminates manual programming and reduces setup time.

ADAPTIVE & FLEXIBLE

Perfect for one-off, damaged, or hard-to-fixture parts.

INDUSTRIAL RELIABILITY

Proven solid-state technology delivers strong, metallurgically bonded repairs with minimal heat input.

Why Smart Repair?

- ✓ Eliminates manual programming
- ✓ Reduces operator dependence
- ✓ Improves consistency and quality
- ✓ Lowers total cost of repair
- ✓ Faster turnaround and asset utilization

Ideal for defense applications

- Aerospace
- Naval & Marine
- Ground Vehicles
- Support Equipment
